- Attention to Detail
- Adaptability
- Time Management

Certifications

Full stack Web development
Masai School

Pawanraje Kadam

Full Stack Web Developer

Professional Summary

Driven Full Stack Web Developer with 1.5 years of hands-on experience in building dynamic web applications using the MERN stack. Skilled in both front-end and back-end development, adept in collaborative and solo project environments. Strong problem-solving, communication, and project management skills.

Experience

- Hana Software, Inc** | Full stack developer | March 2023 - September 2024
- Developed and maintained user-facing features using React.js, enhancing user experience.
 - Collaborated with back-end developers to integrate APIs and ensure smooth data flow.
 - Wrote clean, scalable, and maintainable code adhering to best practices, improving code quality and efficiency.
 - Conducted code reviews and debugging, contributing to the team's overall code quality improvement.

Projects

- Cloud Kitchen** | [Live Demo Link](#) | [Github Repo Link](#)
- JavaScript | Redux | React | Git | Node.js
- Express.js | MongoDB | RESTful APIs | HTML5
- Developed a full-stack Cloud Kitchen application using React, Redux, Node.js, Express.js, and MongoDB for seamless order management and user authentication.
 - Integrated Razorpay for secure online payments, ensuring financial transactions are smooth and reliable.
 - Utilized Tailwind CSS and Framer Motion to create a visually engaging and responsive user interface with smooth animations.
 - Designed and optimized MongoDB database models and queries to manage user data and orders efficiently.

- Url Shortner** | [Live Demo Link](#) | [Github Repo Link](#)
- JavaScript | Redux | Git | Node.js | React | MongoDB
- RESTful APIs | Express.js | Responsive Web Design
- Developed a URL shortener application using React.js for frontend, ensuring an intuitive and responsive user interface.
 - Implemented backend services using Node.js and Express.js, providing robust and scalable API endpoints.
 - Created and optimized MongoDB database models and queries to efficiently store and retrieve URL data.
 - Integrated frontend and backend components to facilitate seamless URL shortening and redirection functionality.
